

# Individual Stopper Insertion with MS-25

Stopper insertion for  
small-batch production

The MS-25 stopper insertion tool is designed for syringe and cartridge sizes ranging from 0.5ml to 50ml, with the 1ml and 3ml tools being the most commonly used. The MS-25 is versatile and can be used for high-volume production runs, as well as in clinical trials, R&D, and small batch work. Additionally, the tools are adjustable for different fill levels and fully autoclavable.

## Key Features

- Supports syringe cartridges from 0.5 ml to 50 ml
- Adjustable for different fill levels
- Fully autoclavable for sterilization
